👤 Profile

I have 6 years of experience as a web developer and through continuous studies on new technologies I try to adapt new projects to the best practices in the agile process of development. I have more experience working with the .NET platform using the C # language, however I am looking for new opportunities and I am available to learn and improve my skills in other languages and platforms as well. I value the final quality of the product delivered to the customer through a dynamic and motivated team that values the continuous improvement and dissemination of knowledge among the team.
Certification: MCPS: Microsoft Certified Professional & MS: Programming in HTML5 with JavaScript and CSS3.
